# USING THIS BOOK

*Pokémon Master Trainer: Ultimate Edition* has a robust, yet simple, Pokémon Battle system, and once you learn the core mechanics, most Moves are self-explanatory. However, there are a few that are more complicated in an effort to mimic their function in the Pokémon video games.

This book contains iconography keys for the symbols you'll see on a Pokémon token. It also contains a glossary of Special Moves that have unique functions that aren't covered by the Move Effect Icons.

If you're ever unsure how a Move works, check here. If you still aren't sure, you can make something up in the moment, or ask for help in our Discord server (linked in the Credits of the [GAME RULES](#) book).

**NOTE:** Remember that any Move Effect that is accompanied by a **red number** means you must roll the **Effect Die**. The effect triggers only if the result is at least equal to the **red number**.

# MOVE EFFECT ICONS - WHITE

## K.O. (SELF)

# FIELD MOVE EFFECTS

Some Moves require that a Field Move card is played. There are 2 Field Move card slots in a Battle - one on the **ATTACKER**'s side of the Battle Arena, and one on the **DEFENDER**'s side. When a Field Move card is played, it can be played in the slot on either side. If there is already a Field Move card in the slot on that side, it must be discarded to put the new one in play.

Field Move card effects that refer to "Pokémon on this team" will apply to the team on the side of the Battle Arena that the card is played on. Otherwise, the effect applies to both teams. Multiples of the same Field Move card in the Battle Arena at once do not stack.

## FIELD CLEAR

Play the **Grassy Terrain** Field Move card.
